These statements include expectations concerning the Company's potential performance in the future, including with respect to anticipated future benefits from investments in the Company's business and strategic efforts to grow the Company's brand portfolio and content delivery over the longer-term, and the Company's ability to achieve its other financial and business goals and may be identified by the use of forward-looking words or phrases. The Company's actual actions or results may differ materially from those expected or anticipated in the forward-looking statements due to both known and unknown risks and uncertainties. Specific factors that might cause such a difference include, but are not limited to: (i) the Company's ability to design, develop, produce, manufacture, source and ship products on a timely and cost-effective basis, as well as interest in and purchase of those products by retail customers and consumers in quantities and at prices that will be sufficient to profitably recover the Company's costs; (ii) downturns in economic conditions affecting the Company's markets which can negatively impact the Company's retail customers and consumers, and which can result in lower employment levels, lower consumer disposable income and spending, including lower spending on purchases of the Company's products; (iii) other factors which can lower discretionary consumer spending, such as higher costs for fuel and food, drops in the value of homes or other consumer assets, and high levels of consumer debt; (iv) potential difficulties or delays the Company may experience in implementing cost savings and efficiency enhancing initiatives; (v) other economic and public health conditions or regulatory changes in the markets in which the Company and its customers and suppliers operate which could create delays or increase the Company's costs, such as higher commodity prices, labor costs or transportation costs, or outbreaks of disease; (vi) currency fluctuations, including movements in foreign exchange rates, which can lower the Company's net revenues and earnings, and significantly impact the Company's costs; (vii) the concentration of the Company's customers.

potentially increasing the negative impact to the Company of difficulties experienced by any of the Company's customers or changes in their purchasing or selling patterns; (viii) consumer interest in and acceptance of the Discovery Family Channel, and programming created by Hasbro Studios, and other factors impacting the financial performance of the network and Hasbro Studios; (ix) the inventory policies of the Company's retail customers, including retailers' potential decisions to lower their inventories, even if it results in lost sales, as well as the concentration of the Company's revenues in the second half and fourth quarter of the year, which coupled with reliance by retailers on quick response inventory management techniques increases the risk of underproduction of popular items, overproduction of less popular items and failure to achieve compressed shipping schedules; (x) delays, increased costs or difficulties associated with any of our or our partners' planned digital applications or media initiatives; (xi) work disruptions, which may impact the Company's ability to manufacture or deliver product in a timely and cost-effective manner; (xii) the bankruptcy or other lack of success of one of the Company's significant retailers which could negatively impact the Company's revenues or bad debt exposure; (xiii) the impact of competition on revenues, margins and other aspects of the Company's business, including the ability to offer Company products which consumers choose to buy instead of competitive products, the ability to secure, maintain and renew popular licenses and the ability to attract and retain talented employees; (xiv) concentration of manufacturing for many of the Company's products in the People's Republic of China and the associated impact to the Company of social, economic or public health conditions and other factors affecting China, the movement of products into and out of China, the cost of producing products in China and exporting them to other countries; (xv) the risk of product recalls or product liability suits and costs associated with product safety regulations; (xvi) the impact of other market conditions, third party actions or approvals and competition which could reduce demand for the Company's products or delay or increase the cost of implementation of the Company's programs or alter the Company's actions and reduce actual results; (xviii) the impact of litigation or arbitration decisions or settlement actions; and (xviii) other risks and uncertainties as may be detailed from time to time in the Company's public announcements and Securities and Exchange Commission ("SEC") filings. The Company undertakes no obligation to make any revisions to the forward-looking statements contained in this release or to update them to reflect events or circumstances occurring after the date of this release.

This press release includes a non-GAAP financial measure as defined under SEC rules, specifically EBITDA. EBITDA represents net earnings attributable to Hasbro, Inc. excluding net loss attributable to noncontrolling interests, interest expense, income taxes, depreciation and amortization. As required by SEC rules, we have provided reconciliation on the attached schedule of this measure to the most directly comparable GAAP measure. Management believes that EBITDA is one of the appropriate measures for evaluating the operating performance of the Company because it reflects the resources available for strategic opportunities including, among others, to invest in the business, strengthen the balance sheet, and make strategic acquisitions.

The press release also includes the Company's Consolidated and International segment net revenues excluding the impact of changes in exchange rates. Management believes that the presentation excluding the impact of exchange rate changes provides information that is helpful to an investor's understanding of the underlying business performance absent exchange rate fluctuations which are beyond the Company's control. These measures should be considered in addition to, not as a substitute for, or superior to, net earnings or other measures of financial performance prepared in accordance with GAAP as more fully discussed in the Company's financial statements and filings with the SEC. As used herein, "GAAP" refers to accounting principles generally accepted in the United States of America.
